IN THE CLAIMS

The status of claims in the case is as follows:

1-21 [Canceled]

7

- [Withdrawn] A program storage device readable by a 1 22. machine, tangibly embodying a program of instructions executable by a machine to perform method steps for 3 delivering workflow solutions that are immediately useful 4 5 for customers and readily modified by said customers, said method steps comprising: 6
- providing to a customer a generic business process 8 representation including a set of points in ndimensional space, each point including at least one 10 verb dimension, at least one noun dimension, and at least one attributes dimension; and 11 enabling said customer by selecting a said point to 12

13 modify said representation for the process represented by said point by selectively adding, deleting and 14 15 changing a set of actions representing said verb dimension, a set of managed resource objects 16

END919950140US2

17	representing said noun dimension, and a set of
18	expressions representing said attributes dimension,
19	each said expression being capable of evaluation to a
20	Boolean value.

- 23. [Previously amended] A program storage device readable
 by a machine, tangibly embodying a program of instructions
 executable by a machine to perform method steps for
 capturing in workflow solutions the policies a business uses
- 5 to quide its activities, said method steps comprising:

operating a digital computer to visually display in a
display panel of a computer input/output device a
navigation space and a plurality of scrollable lists
including a noun list, a verbs list and an attributes
list;

responsive to selection by a user of said computer
input/output device of a noun list entry, a verbs list
entry, and an attributes list entry, operating said
digital computer to highlight in said navigation space
a point representing a process tuple;

END919950140US2

S/N 09/756,931

p.11

16	responsive to selection by said user of said computer
17	input/output device of two entries from two of said
18	lists, operating said digital computer to highlight in
19	said navigation space a highlighted plane of points
20	representing process tuples for all entries in the list
21	not selected;
22	responsive to selection of a highlighted point by said
23	user of said computer input/output device, operating
24	said digital computer to display a definition of a
25	workflow process represented by said highlighted point
26	and an embedded object for executing said workflow
27	process; and
28	operating said digital computer selectively to execute
29	said embedded object to perform said workflow process.
30	24. [Withdrawn] A program storage device readable by a
31	machine, tangibly embodying a program of instructions
32	executable by a machine to perform method steps for making
33	known within an overall business context processes impacted
34	by a policy, said method steps comprising:
35	visually displaying in a display panel a navigation

4

END919950140US2

36

6

37	noun list, a verbs list and an attributes list;
38	representing in said navigation space a set of points
39	in n-dimensional space, each said point being a process
40	tuple having a verb dimension, a noun dimension, and an
41	attributes dimension;
42	responsive to selection of a policy in said attributes
43	list, highlighting in said navigation space all process
44	tuples representing process points including said
45	policy.
1	25. [Withdrawn] A program storage device readable by a
2	machine, tangibly embodying a program of instructions
3	executable by a machine to perform method steps for enabling
4	understanding of the mechanisms, interactions and inter-
5	relationships of a business process, said method steps

space and a plurality of scrollable lists including a

representing said business process as a set of points
in n-dimensional space including at least one verb
dimension, at least one noun dimension, and at least

END919950140US2

comprising:

S/N 09/756,931

10		one attributes dimension;
11		navigating said space by selecting and opening a
12		process point to display another process
13		representation; and
14		extending said space selectively by redefining said
15		dimensions and grouping scalar definitions into super
16		scalar values.
1	26.	[Canceled]
2	27.	[Withdrawn] System for representing any business
3		esses comprising:
•	P 200	
4		means for defining each of a plurality of processes as
5		a 3-tuple including a noun, a verb and an attribute;
6		means for displaying a selected process as a process
7		point in navigation space; said process point
8		representing logical changes in context of navigation
9		space for exploring or defining business processes.;
10		and

. 6

END919950140US2

- means for nesting a first navigation space in a process 11
- point in a second navigation space. 12
 - [Canceled] 1 28.
- [Withdrawn] A business process representation, 2
- 3 comprising:
- a point in n-dimensional space including at least one 4
- verb dimension, at least one noun dimension, and at 5
- least one attributes dimension; 6
- said verb dimension representing a set of actions, said 7
- noun dimension representing a managed resource object, 8.
- said attributes dimension representing a set of 9
- expressions capable of evaluation to a Boolean value. 10
 - 1 [Withdrawn] The business process representation of
 - claim 29, said set of actions for said verb dimension 2
 - including add, delete, change, and determine. 3
- 1 31. [Withdrawn] The business process representation of

- 2 claim 29, said resource objects for said noun dimension
- 3 including account, balance, customer, loan, teller,
- 4 interest.
- 1 32. [Withdrawn] The business process representation of
- 2 claim 29, said set of expressions for said attributes
- dimension including less than, overdue, greater than, court
- 4 order, audit, null.
- 1 33. [Withdrawn] The business process representation of
- 2 claim 29, said verb dimension, said noun dimension, and said
- 3 attributes dimension comprising a process tuple including a
- 4 verb action, a noun object, and an attribute expression.
- 5 34. [Withdrawn] Method for systematically defining the
- 6 current and future business processes of an enterprise,
- 7 comprising the steps of:
- providing to a business process representation
- 9 including a set of points in n-dimensional space, each
- 10 point including at least one verb dimension, at least

3

END919950140US2

11	one noun dimension, and at least one attributes
12	dimension; and
13	selectively modifying said representation by
14	selectively adding, deleting and changing a set of
15	actions representing said verb dimension, a set of
16	managed resource objects representing said noun
17	dimension, and a set of expressions representing said
18	attributes dimension, each said expression being
19	capable of evaluation to a Boolean value.
1	35. [Withdrawn] The method of claim 34, further comprising
2	the step of:
3	modifying said representation by grouping subsets of
4	any of said dimension sets.
1	36. [Withdrawn] The method of claim 35, further comprising
2	the step of:

selectively adding to a dimension new group elements,

thereby combining noncontiguous sets of planes in said

- 5 n-dimensional space into a single plane.
- 1 [Withdrawn] The method of claim 35, further comprising
- 2 the step of:
- 3 selectively subsetting elements of a group of elements
- 4 by defining a new elements added to a set as belonging
- 5 to an existing element.
- 1 [Withdrawn] The method of claim 34, further comprising
- 2 the steps:
- 3 responsive to a first user request, prompting said user
- for a file name and dimension names and, responsive to
- 5 said names, creating a new process space; and
- 6 responsive to a second user request, displaying to said
- 7 user a window selectively enabling said user to select
- 8 a directory and then within that directory a file or to
- 9 enter a name for a file, reading said file, and
- 10 creating a new process space main window to reflect the
- 11 contents of said file.

10

1.	39.	[Withdrawn]	Method	for	enabling	automatic
----	-----	-------------	--------	-----	----------	-----------

- 2 interpretation of processes, comprising the steps of:
- defining process space as a set of points in n-3
- dimensional space, each point including at least one 4
- 5 verb dimension, at least one noun dimension, and at
- least one attributes dimension; 6
- 7 said verb dimension, said noun dimension, and said
- attributes dimension comprising a process tuple 8
- 9 including a verb action, a noun object, and an
- 10 attribute expression;
- 11 naming a group of points in said process space as a
- 12 named noun and adding said named noun to said noun
- 13 dimension as a noun object; and
- 14 selectively defining processes using existing or new
- verbs for said named noun. 15
 - 1 40. [Currently amended] A program storage device readable
- 2 by a machine, tangibly embodying a program of instructions

11

3	executable by a machine to perform method steps for
4	systematically defining the current and future business
5	processes of an enterprise, said method steps comprising:
6	operating a digital computer to provide to a computer
7	display panel a business process representation
8	including a set of points in n-dimensional space, each
9	point including at least one verb dimension, at least
10	one noun dimension, and at least one attributes
11	dimension;
12	operating said digital computer to selectively modify
13	said representation by selectively adding, deleting and
14	changing a set of actions representing said verb
15	dimension, a set of managed resource objects
16	representing said noun dimension, and a set of
17	expressions representing said attributes dimension,
18	each said expression being capable of evaluation to a
19	Boolean value;
20	operating said digital computer responsive to selection
21	of by a user selection by a user of a point selectively
22	to display a definition of a workflow process
23	represented by said point and an embedded object for

2-3	executing said workflow process; and
25	operating said digital computer selectively to execute
26	said embedded object to perform said workflow process.
27	41. [Previously presented] A digital computer for capturing
28	in workflow solutions the policies a business uses to guide
29	its activities, comprising:
30	a display panel of said digital computer for displaying
31	a navigation space and a plurality of scrollable lists
32:	including a noun list, a verbs list and an attributes
33	list;
,	
34	said digital computer operating said display panel to
35	highlight in said navigation space a point representing
36	a process tuple responsive to user selection of a noun
37	list entry, a verbs list entry, and an attributes list
38	entry;
	·
39	said digital computer being responsive to selection by
40 .	a user of said display panel of two entries from two of
41	said lists, to highlight in said navigation space a
42	highlighted plane of points representing process tuples
	END919950140US2 13 S/N 09/756,931

43	for all entries in the list not selected, and
44	responsive to selection of a highlighted point to
45	highlight in said display panel a definition of a
46	workflow process represented by said highlighted point
47	and an embedded object for executing said workflow
48	process; and
49	said digital computer selectively responsive to
50	selection of said embedded object for executing said
51	workflow process.
1	42. [Withdrawn] Method for representing business processes
2	comprising the steps of:
3	defining each of a plurality of processes as a 3-tuple
4	including a noun, a verb and an attribute; and
5	displaying a selected process as a process point in
6	navigation space;

7

8

nesting a first navigation space in a process point in

14 S/N 09/756,931

a second navigation space; and

9	nesting a second process space within a first process
10	responsive to user reference to a second process in the
11	definition of said first process.

- 1 43. [Withdrawn] The method of claim 42, further comprising
- the steps of
- 3 providing within said nested space the union of all
- elements referenced in all process definitions within
- said nested space as minimal values of each said
- 6 dimension; and
- 7 adjusting the values of each said dimension to
- 8 encompass any new user entered nouns, verbs or
- attributes.
- 1 44. [Withdrawn] The method of claim 42, further comprising
- 2 the steps of
- 3 enabling a user to traverse nested navigation space;
- and

5	responsive to said user traversing from a first process
5	space to a process space nested within a point in said
7	first process space, highlighting in the nested space
3	those process points explicitly referenced in said
€	point in said first process space.

Claims 45-62. [Canceled]
